

Australian Manufacturer Delivers Marine Coatings that Combine Sustainability and Performance

Founded in 2011 and headquartered in Sydney, Australia, **Greencorp Marine** manufactures premium coatings for boats designed to improve their performance, appearance and longevity from top to bottom. Greencorp Marine's product lines include PropOne™, a non-biocidal foul release coating system for underwater running gear; JustTeak™, a complete solution that rejuvenates and protects teak decking and furniture, and Crystilium™, a range of clear coatings and cleaners that renew, protect and extend the life of onboard surfaces.

"Our products have a reputation for superior performance and we export them to more than 30 countries worldwide," said Eli Green, owner and founder of Greencorp Marine. "Our customers make a good profit and their customers get amazing results and value for their money."

PropOne

Designed for use on propellers and all metallic underwater running gear, PropOne is a latest-generation non-biocide foul release coating that prevents sealife from getting a grip.

"We have now been selling PropOne in the USA for over 10 years, it's a proven product that's used on thousands of boats worldwide every year," Green said. PropOne benefits include:

- Performance: Increased speed and lower fuel consumption, compared to a craft with fouled surfaces.
- Time: Keeps working for one to two years in-water.
- Slickness: Non-stick coating that marine life struggles to adhere to.
- Anti-corrosion. High-performance corrosion protection for ferrous & non-ferrous metals.

Greencorp offers a fully trained and licensed applicator program combined with prompt technical support. "We get new PropOne applicators and boatyards all the time who are brave enough to try something different. When they see it works and we get their trust, that's what it's all about for us," Green said.

JustTeak

A highly effective marine-grade teak-cleaning system, JustTeak quickly and easily rejuvenates teak decking and outdoor teak furniture. The three-part system includes a Teak Cleaner, Brightener and Sealer.

Start by applying the Teak Cleaner to remove stains, old coatings and the graying to which teak is prone in the harsh marine environment. It is formulated for performance while remaining gentle enough for your teak. The next step is to apply Teak Brightener, which continues stain removal while brightening the teak surfaces. Finally, Teak Sealer provides a beautiful, natural finish that protects teak from sun, rain and further staining. When it's time to reapply, Teak Cleaner easily removes the Teak Sealer so you can begin the JustTeak cycle again.

Crystilium

The high-tech Crystilium marine coating range provides an economical, environmentally sustainable alternative to regular polishing or even repainting of boat topsides and other hard surfaces on board. Once surfaces are polished, Crystilium Clear Coat maintains surfaces and colors to a bright, easy-to-clean, high-gloss shine.

Crystilium is available in two formulations. Clear Coat Lite is designed for use on yacht superstructures and maintains the original painted look and shine for at least one year. Clear Coat Pro is used to bring exhausted paint and gelcoat back to life, providing a long-lasting alternative to repainting that can be applied by hand and not only spray. The result

is an ultra-thin, hard, durable glossy surface that is highly resistant to staining and defends against scuffs from lines, fenders, washing, etc.

"Applying Crystilium Pro to your customer's boats can allow them to replace or postpone repainting, saving money as well as reducing their environmental footprint," said Green.

The Crystilium range also includes Crystilium Clear Coat Dissolver and the Crystilium Cleaning Range, high-performance boat topside and hull cleaning and detailing products designed to complement Crystilium Clear

Coat and maintain the yacht's beautiful finish.

Dealer inquiries welcome

Greencorp Marine products are available through a variety of distributors across North America. The company maintains a centrally located warehouse in Columbus, Ohio, enabling fast shipping times.

"We are open to taking on new distributors and/or dealers. As a family-owned business we care more about relationships than just profit. We are easy to deal with and team players," Green said.
