

Environmental impact

Undertaking a full repaint of your vessel has a huge environmental impact. Massive amounts of CO² emissions and dust are generated when repainting. Not to mention the substantial amounts of paint, plastics and consumables that are also required. However, Crystilium™ can be applied after basic polishing preparation, greatly delaying and even preventing this environmental impact.

Crystilium™ Range

Check the amount required at:
www.greencorpmarine.com/crystilium/coverage

CRYSTILIUM™ CLEAR COAT

- 125 mL bottle
- 250 mL bottle

CRYSTILIUM™ CLEAR COAT DISSOLVER

- 5 Litre bottle
- Softens and removes Crystilium Clear Coat.*

CRYSTILIUM™ PH NEUTRAL BOAT WASH

- 1 Litre bottle
 - 5 Litre bottle
- High performance, gentle, free rinsing boat wash.*

Crystilium™
Premium surface protection

**EASY CLEAN
FOR 2+ YEARS
SAVE TIME
AND MONEY**

**Long-lasting gloss
with excellent stain
protection**

Crystilium™ is a clear coat system which protects hard surfaces. It has been developed to ensure increased surface aesthetics due to its long-lasting gloss and excellent protection against stains on marine paints and gel-coat.

Result: Before (dull) and after (gloss)

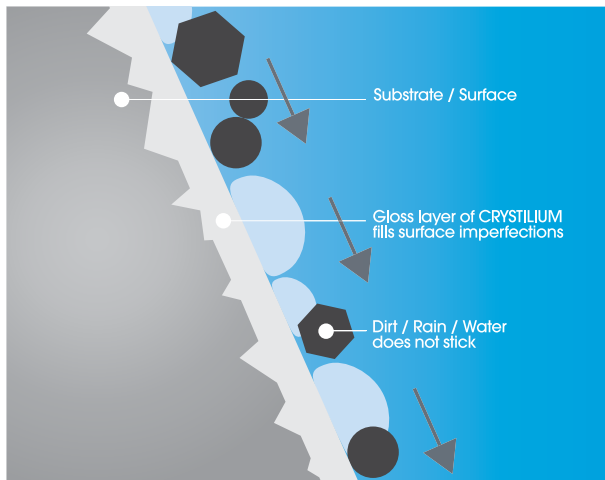

Yacht: Coated with Crystilium™

Application of Crystilium™

AVOID REPAINT ... RENOVATE AND PROTECT

Crystilium™ is a thin high-performance coating that is an economical alternative to re-painting. Applied by hand (roller or brush), Crystilium™ leaves a high gloss, smooth surface that will not stain. Its very hard surface improves scuff resistance from ropes, boat fenders, general washing, etc.

Crystilium™ has undergone rigorous independent testing to demonstrate suitability on all hard non-porous surfaces.

Benefits of Crystilium™

PERFORMANCE

Highly transparent ultra-thin protective layer. Easy to clean, stain-free surfaces for 2+ years.

APPEARANCE

Glossy, tough coating that protects underlying substrate against weathering and restores previously weathered surfaces and colours to a bright, high gloss appearance.

TECHNOLOGY

Latest generation permanent clear coat.

QUICK APPLICATION

Crystilium can be applied quickly in or out of the water. Low environmental impact.

COMPATIBILITY

Coating will not dissolve, soften, or remove paint or decals that are part of substrate being coated.

REMOVAL

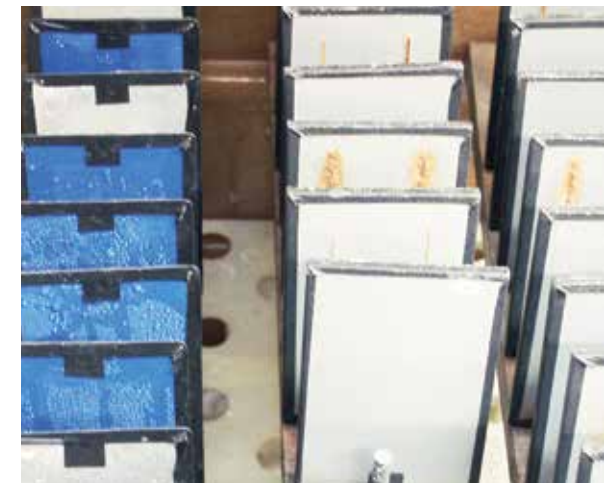

Crystilium Clear Coat can be removed using our Clear Coat Dissolver.

AVAILABILITY

Australian manufactured and owned, with distribution worldwide.

Easy clean for 2+ years with proven application to all hard surfaces

- Marine topside paint
- Polyurethanes
- Gel-Coat
- Acrylics and epoxies
- Powder coatings
- All marine metals
- Nylon, polycarbonate, perspex, vinyl

After 1,000 hours of alternating QUV/cyclic salt spray exposure testing Crystilium™ showed no signs of failure.
